

# Swift Parrot-Regent Honeyeater Record Sheet

Observer Name/s: .....  
 Postal Address: .....  
 Mobile:..... Home or Work Ph: (...)  
 Email:.....

## Site Details

Location (or distance and direction from nearest named landmark or town): .....  
 Date: ..... Time started: ..... Time finished: .....  
 Number of observers:..... Altitude (if known):.....

## Map details (Map No, Name and Scale not required if GPS co-ords provided)

Map No: ..... Map Name & Scale: ..... GPS used: Yes/No      GPS Datum:.....  
 Easting: ..... Northing: .....(e.g. East: 243560    North: 6027450) Zone..... (e.g. 55 or 56 )  
 Lat: ..... Long: .....(e.g. Lat: 33°40'15"    Long: 150°45'10")

## Swift Parrot (SP) / Regent Honeyeater (RH) observations

Swift Parrots seen / heard (including zero):.....

Regent Honeyeaters seen / heard (including zero):.....

Details of activity (e.g. foraging, aggression, perching, calling etc):.....

Food/Habitat Resources Used: .....

## Other nectivorous bird species present (regardless of whether SP/RH recorded)

Other nectivorous species present (e.g. Honeyeaters, Lorikeets)	Abundance (estimate no. of birds)	Interaction with SP/RH (e.g. aggression / competing for food resources)

## Habitat / Site Description

Please describe any relevant details about the site such as topography, vegetation, presence / absence of mistletoe and if possible the species and size of trees being used by SP/RH: .....  
 .....  
 .....

## Site Map/Additional Information

Please include any additional information (e.g. simple map, shrub species present, direction of flight, additional birds. etc) on the other side of this form.

Please return completed forms to the Woodland Birds for Biodiversity Project  
 Birdlife Australia, Suite 2-05, 60 Leicester St, Carlton VIC 3053    Ph: (03) 9347 0757; fax (03) 9347 9323
